

NIKEC'S Paperlite Survey 2020

During our recent webinar series we asked firms how they are using paper and PDF tools

100% of respondents told us their firm has embarked on a Paperlite journey

72%

of respondents regularly take paper files off site for meetings and court

Despite most firms embarking on a Paperlite journey, it's clear many are still highly reliant on paper files. In order for firms to truly become Paperlite and no longer rely on paper files, they must invest in tools to help make their files digital and make use of the greater functionality such products can provide.
